This map summarises the state of initiatives for metadata aggregation at local, regional and national level in the early summer of 2009. It is based on the results of the two EuropeanaLocal partner and content provider surveys. The information will contribute to the work being undertaken in European v1.0 and that of the Europeana Content and Partners Group.

The map gives information on all the aggregators identified in the surveys. It shows aggregators identified in the surveys by country and indicates for each:

- Name of the service
- Level: International, European, National (shown by red squares), Regional (shown by blue squares)
- Domain (Library, Museum, Archive, Cultural Heritage, Business, General, Thematic, Music, Research)

International and European aggregators are shown in the box at the top of the map
