Machine Translation for the 2015 EU Presidency at the Latvian National Library
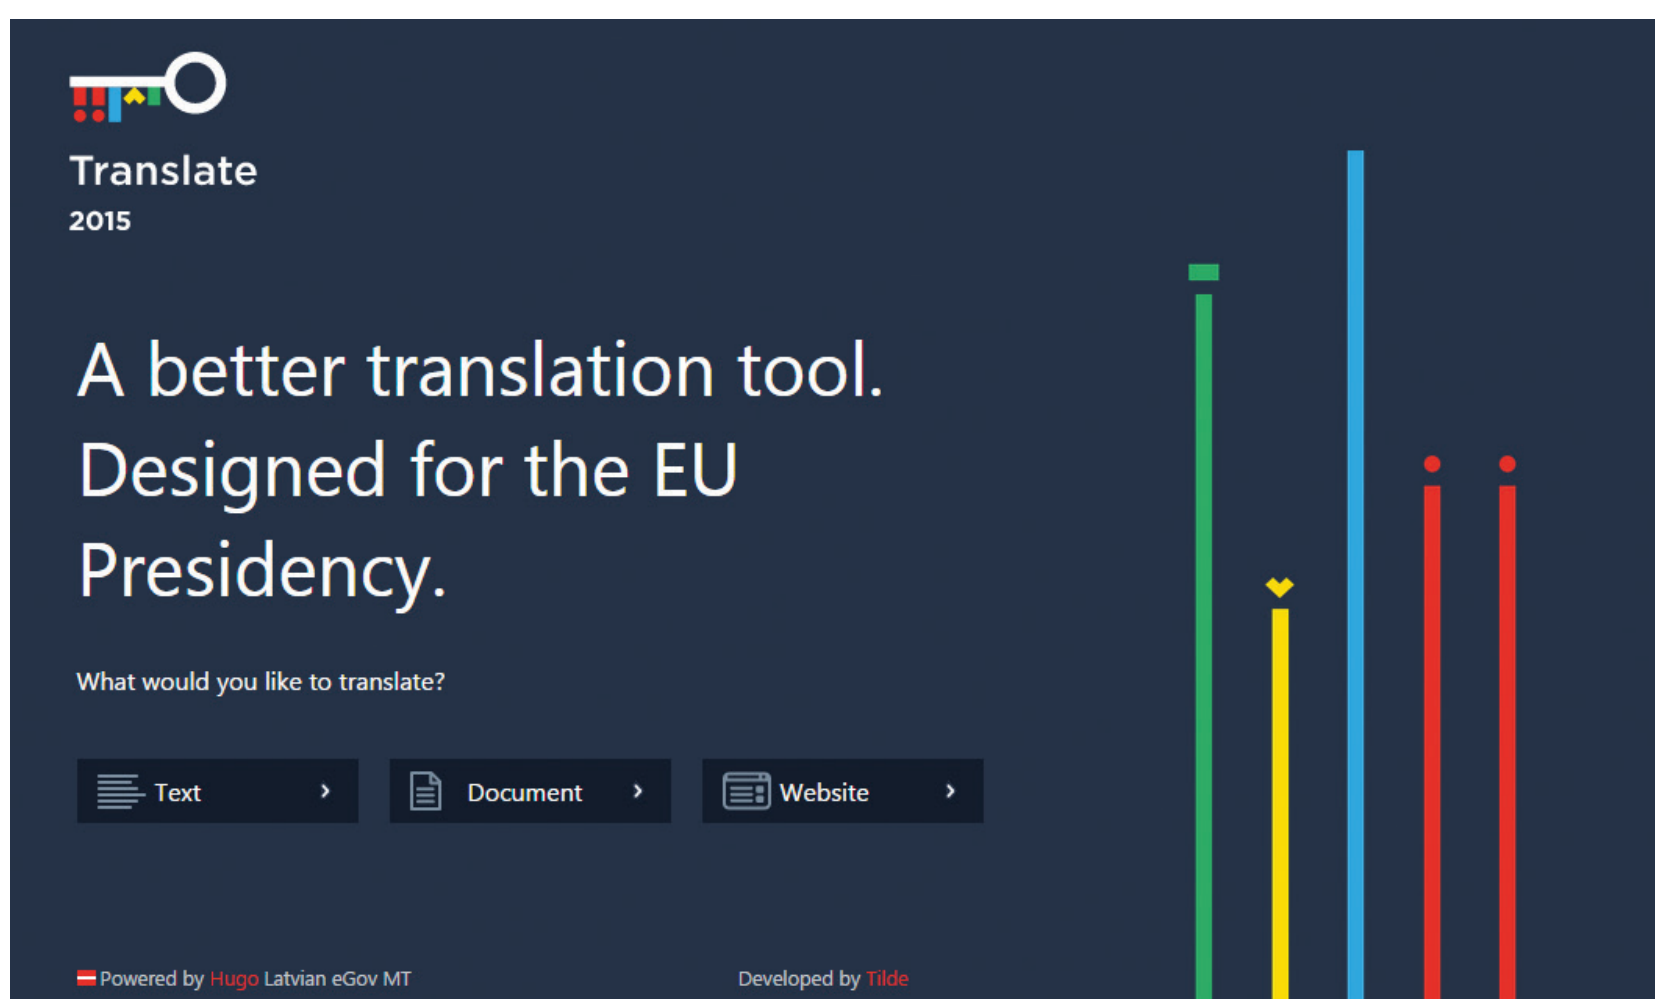

Rihards Kalniņš, Tilde (rihards.kalnins@tilde.com)

LATVIA TRANSLATES WITH HUGO.LV

The Latvian public sector's machine translation service (LV-EN-LV), trained on the world's largest parallel corpus for Latvian.
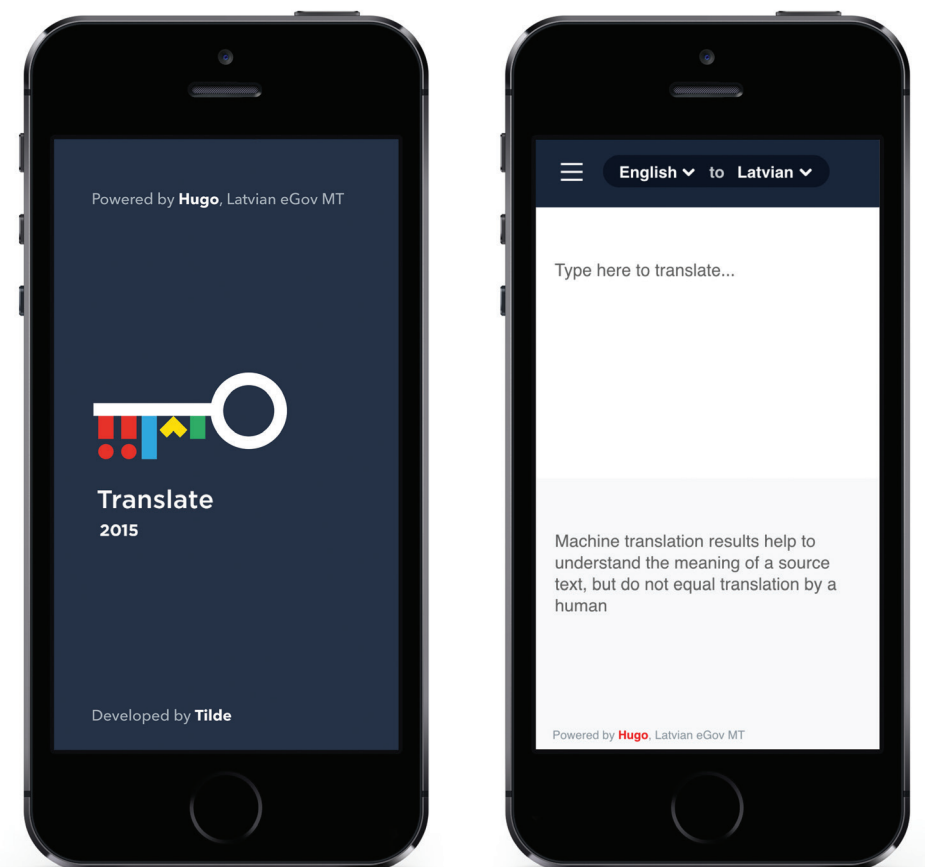

The service was adapted for the 2015 EU Presidency with: (1) terminology in the right inflectional forms, (2) translation memories, (3) glossaries,(4) in-domain corpora.

Result: Multilingual tools for journalists and delegates from 28 EU Member States

Desktop app (Windows)

Mobile app (iOS, Android, Windows Phone)

Users can translate Latvian media sites into English, read online encyclopaedias, browse digital archives, translate press materials, and access government documents for general research purposes.
